

Conference Announcement: 13th International Conference on Arthroplasty, February 21-22, 2020

Abdelmonem Hegazy

With a great response and feedback we received at the Arthroplasty 2019 conference, Pulsus Conferences is proud to announce our upcoming "13th International Conference on Arthroplasty" scheduled to take place at the Arthroplasty and Orthopedics Conference in **Paris, France** on **February 21-22, 2020**.

For Arthroplasty 2020 conference we are expanding our focus towards all aspects of Orthopedic Surgery, Sports-Medicine, Orthopedics, Trauma, Rheumatology Our organizing committee is gearing up for more innovative and explorative sessions to unleash the boundaries of the Arthroplasty and Orthopedic Surgery. Your expertise and knowledge in the area of Arthroplasty 2020 will provide an opportunity to discuss and respond to a series of questions about the status of advanced Orthopedic and Arthroplasty Surgical techniques.

Meet your target business sector with individuals from and around the globe concentrated on finding out about new emerging prostheses with applied technologies of biomaterials, nanotechnology and Tissue engineering in Arthroplasty and Orthopaedic Surgery. The global orthopedics market was valued at \$60 billion in 2019 and it has been driven primarily by the growth of the aging population.

According to global data analytics, the market is set to grow to \$100 billion in 2030. The global orthopedics market consists of many device segments, including bone cement, surgical power tools, joint replacement implants and prosthetic limbs, Orthotic devices. The largest market segments were spine devices, hip and knee reconstruction implants, and trauma fixation. These markets growths are largely driven by the aging global population and subsequent increasing prevalence of diseases that primarily affect the elderly including osteoarthritis and osteoporosis. The market segment expected to undergo the fastest growth is extremity implants, this segment covers reconstructive implants for the small joints, ankle, digits, elbow, shoulder the growth in this market segment is

powered by the increasing awareness of patients and physicians, user friendly orthopedic implants and technological innovations contributing to more advanced implant designs.

Arthroplasty 2020 conference provides a complete understanding of both engineering and scientific strategies in approaching and solving technical glitches to create a better and benefiting global health community. Explore the latest advances in the treatment and management of Arthroplasty and Orthopedic Surgery. This is an opportunity to catch up on new developments in this complex area of medicine and strengthening ties and fostering collaboration within the global health community.

We would like to organize this conference with your support to gather all the Orthopedic researchers in a single platform, hope we will be honoured with your support to organize Arthroplasty 2020 in a grand level, your support will be the key of success for our next year conference.

With active contribution and support, we look forward to seeing your presence to make this event once again successful.

Once again, it's our pleasure to welcome you to our upcoming Arthroplasty 2020 conference.
