

Gynecology Congress 2020 - Market Analysis

Dr. Ali Ghaz

Scope and Importance

Gynaecology and Women's health is referred to the fact that health problems face a wide variety of challenges: managing the care of patients of all ages that are specific to women anatomy. It relates to the unique issues which includes pregnancy, menopause, and conditions of the female organs. Women's health also includes medical situations in which women face not directly related to their biology but due to gender-differentiated access to medical treatment. Women's health issues have attained higher international perceptibility in the recent decades. Such as the United States has a higher ratio of maternal deaths than at least 40 other countries, even though it spends more money per capita for maternity care than any other. Maternal deaths must be reviewed to make motherhood safer. The standing of maternal deaths within the u. s. was a part of a bigger report on the worldwide, regional, and national levels and causes of maternal mortality from 1990-2013. The findings recommend that solely sixteen countries can reach a target of a seventy fifth reduction within the maternal mortality quantitative relation (or range of maternal deaths per one hundred,000 live births) by 2016.

The targeted policies and government initiatives, to decrease the burden of the women health diseases, have enabled women to lead healthier lives, while some significant gender-based health disparities remain the same in many countries. With limited awareness and less income levels, developing countries are making health improvements for women exceptionally difficult. The market for women's healthcare is projected to grow at a steady CAGR of 5.04% during the forecast period from 2017-2023.

About Venue:

Dubai is that the most thickly settled town within the United Arab Emirates (UAE). It is placed on the southeast coast of the Persian Gulf and is one amongst the seven emirates that structure the country. The city of metropolis is found on the emirate's northern lineation and heads up the Dubai-Sharjah-Ajman metropolitan space.

Dubai has emerged as a world town and business hub of the center East. It is conjointly a significant transport hub for passengers and lading. By the Sixties, Dubai's economy was based on revenues from trade and, to a smaller extent, oil exploration concessions, but oil was not discovered until 1966. Oil revenue was 1st began to flow in 1969. Dubai's oil revenue helped to accelerate the first development of town, but its reserves are limited, and production levels are low: today, less than 5% of the emirate's revenue comes from oil. The emirate's Western-style model of business drives its economy with the most revenues currently returning from tourism, aviation, real estate, and financial services. Dubai has recently attracted world's attention through many innovative and enormous construction projects and sports events. The city has become picture for its skyscrapers and high-rise buildings, in particular the world's tallest building, the Burj Khalifa.

Dubai provides a world category education and large job opportunities. Glance at revenue of Ob Gyn's:

A Gynaecologist (GYN) earns an average salary of \$195,693 per year in USA. In 2016, Gynecologists earned a mean income of \$220,000, somewhat less than the previous year. About 20% of Gynecologists earned \$350,000 or more, slightly more than the last year's survey. Some 19% earned \$100,000 or less, up from about 12% the previous year. Solo practitioners earned 93% of income from clinical practice compared to 89% for group practice ob-gyns. Those in group practice derived significantly greater percentages of income from teaching/research and other professional activities.
